Macroeconomics and Macroeconomic Policies	7
Introduction	
<i>Eckhard Hein, Torsten Niechoj, Peter Spahn and Achim Truger</i>	17

I. Financialisation – trends and implications

Financialisation: What it is and why it matters	
<i>Thomas I. Palley</i>	29
Private equity: financial engineering or solution to market failure?	
<i>Sigurt Vitols</i>	61
Rising shareholder power – effects on distribution, capacity utilisation and capital accumulation in Kaleckian/Post-Kaleckian models	
<i>Eckhard Hein</i>	89

II. Financial systems and economic development

Financial systems in developing countries and economic development	
<i>Hansjörg Herr</i>	123
Financial flows and international imbalances – the role of catching-up by late industrializing developing countries	
<i>Jan Kregel</i>	151
Crisis prevention and capital controls in India: Perspectives of capital account liberalisation in the current scenario	
<i>Nishtha Khurana</i>	183

III. International monetary order and imbalances

The international monetary (non-) order and the “global capital flows paradox”	
<i>Jörg Bibow</i>	219
Trends that can’t go on forever, won’t: Financial bubbles, trade and exchange rates	
<i>Michael Hudson</i>	249
Macroeconomic policy with open capital accounts	
<i>Fernando J. Cardim de Carvalho</i>	273

IV. Financial (in)stability and financial crises

Inefficient markets: Causes and consequences	
<i>Wolfgang Filc</i>	297
On the manic-depressive fluctuations of speculative prices	
<i>Stephan Schulmeister</i>	309

V. Financial market crisis in the USA

The rise and fall of the U.S. subprime mortgage market	
<i>David F. Milleker</i>	339
On shaky ground: The U.S. mortgage boom and its economic consequences	
<i>Christian E. Weller and Kate Sabatini</i>	355
Global imbalances: The U.S. and the rest of the world	
<i>Dimitri B. Papadimitriou</i>	387
